Subject: Application for Class 2 Permissive Change to FCC Authorized Transceiver with FCC ID: AZ489FT7057

Dear Sir/Madam,

A permissive change is requested for the subject transceiver which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

One (1) New Battery revision was added into the radio family due to alternative replacement parts and design optimization purposes.

Battery Kit No	Descriptions
PMNN4489C	BATT IMPRES LIION TIA4950 HE DENS IP68 2900T

B. PERFORMANCE DIFFERENCES:

EMC has been assessed and no degradation was found, however EME observed degradation as compared to the previous filing but the data continues to be compliant to the FCC limits.

C. CONCLUSION:

This radio continues to meet all FCC emissions requirements for which authorization was granted. However, the SAR degradation that was observed in EME compared to the previous filing still meet the requirements of the Class-2 Permissive Change.

Sincerely,

Deanna Zakharia
Regulatory Compliance Manager
