

Exhibit 1: Identification Label -- Pursuant to 47 CFR 2.925, 2.1033(b)(2) and 2.1033(c)(11)

1.1 Location

On the rear (back) side of the radio product chassis, beneath the battery (see also Exhibit 3).

1.2 Type

The label is of a **black** polyester film laminate with a pressure sensitive adhesive backing. The adhesive is a permanent type acrylic with minimum peel strength of 5 lbs/in.

1.3 Markings (Text)

The FCC label shown is representative of the label that will appear on the radio when in production (some regulatory logo may be missing).

Figure 1.3.1. Representation of FCC Label information.

Please note that this label and its placement complies with the requirement of FCC Rule 47 CFR 2.925(d) that the label be permanently affixed to the product, and be readily visible to the purchaser at the time of purchase. Further, at the time of purchase, batteries are shipped in a separate section or compartment of the radio packaging, and are not attached to the radio. In some instances they may be shipped in separate boxes. So, the end user needs to physically install the battery by removing the battery cover, if any, or attach the battery before using the radio.

The product's Market or Trade Name appears on IMEI label pasted onto the battery floor label.

Exhibit 1A: General Information

1A.1 Production Plans

Quantity production is planned.

1A.2 Data Submittal Procedure

The information in this application is provided in accordance with requirements for certification as outlined in the FCC Rules and Regulations: 47 CFR Part 2, Subpart J; Part 15, Subparts B, C and E; Part 22, Subpart H; Part 24, Subparts B and E; Part 27, Subparts L and M; Part 90, Subpart S.

1A.3 Similar, currently Certified Transceiver

FCC ID: AZ489FT7078.

Model: LEX L10i, LEX L10ig

1A.4 Additional Considerations

In addition to the radio receivers associated with the services authorized within this application, this device integrates a receiver designed to process signals from Global Positioning System satellites. Compliance with FCC requirements was done via the Verification process (47 CFR 2.902).

This device may be considered to be a digital device, per 47 CFR 15.3(k), and can function as a computer peripheral device when functioning as an RF modem, as described in 47 CFR 15.3(r). For this reason, a Part 15B test report is included with this application.
