Subject: Application for Class 2 Permissive Change to FCC Authorized Transceiver with FCC ID:
AZ489FT7134

Dear Sir/Madam,

A permissive change is requested for the subject transceiver which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

No modifications have been made to the radio in this particular application. This PC2 application is triggered due to degradation observed in EME and EMC during ISED New Filing compared to FCC filing results. The degradation was observed specifically on the additional channels and bandwidth used in the ISED testing. As a result, this application is to submit the same SAR and EMC results with the ISED filing.

B. PERFORMANCE DIFFERENCES:

For EME, SAR degradation bands are LTE Band 13 and Band 42. For EMC, RSE degradation band is LTE Band 2.

C. CONCLUSION:

This radio continues to meet all FCC emissions requirements for which authorization was granted.

Sincerely,

Arine Lee
FCC/IC Certification Manager
