Re: **Application for a Class II Permissive Change request to the Certificated Mobile transceiver with FCC ID: AZ492FT3795, 136-174 MHz, 25-54 Watt.**

Gentlemen:

Motorola Inc., 8000 West Sunrise Boulevard, Fort Lauderdale, Florida 33322, herein submits its' request for a Class II Permissive Change for the above transceiver.

Motorola has removed Restricted Materials from some components to make the radios compliant to Environmental Preferred Parts (EPP) per 12G02897W18, Controlled, Restricted and Reportable Materials Disclosure (Rev, G, Appendix C, Section 2) and 12G13933A12, Component Temperature Requirements To Support "PB-Free" Solder.

Performance data on Radiated and Conducted Spurious Emissions were obtained in accordance with 47 CFR 2.1053. All Spurious Emissions performance measurements were performed at the Motorola Plantation Facility OATS, which is an FCC listed site. Attached results shows that data are within FCC limits but degrade to those in the filing when FCC Certification was originally granted.

However, a Class II Permissive Change Request was triggered because Conducted Spurious Emissions degraded when compared to those originally reported to the FCC.

All other data, including RF Exposure, reported to the FCC at the time when Certification was granted continues to be compliant.

Please contact me at (954) 723-5793 if you require any additional information.

Sincerely,

/s/Mike Ramnath (signed)

Manager, Regulatory Compliance
