Subject: Application for a Class II Permissive Change Request to certified transmitter with FCC ID: AZ492FT4829, CDM750 (450-512MHz)

Gentlemen:

Motorola Inc, 8000 West Sunrise Boulevard, Fort Lauderdale, Florida, herein submits its Class II Permissive application to the subject transmitter.

We are adding Emission Designators 5K60F2D and 11K0F2D to existing equipment authorization Grant. This is done without any hardware and/or software change to the transmitter. This designator is required for using the transmitter with Motorola MOSCAD Remote Terminal Units that use QDPSK and FSK modems.

This transmitter is primarily intended for use in a mobile radio application with capabilities for communications with a transmit power of 1--30 Watt. The Power is variable 3.3% of the value listed (1--30 Watt).

The addition of these two Emission Designators does not affect any of the original data, including SAR, on file at the FCC when certification was granted.

The subject transmitter complies with Section 90.203 of the Rules in that the operator cannot directly program transmit frequencies using the unit's normally accessible external controls.

A Class II Permissive application is enclosed. Contact Mike Ramnath at (954) 723-5793 if you require any additional information.

Sincerely,  
*/s/ Mike Ramnath (signed)*
