Re: Application for a Class II Permissive Change request to the Certificated Mobile Transceiver with FCC ID: AZ492FT4856, 438-470 MHz, 1-28W Variable Power.

Gentlemen:

Motorola Inc., 8000 West Sunrise Boulevard, Fort Lauderdale, Florida 33322, herein submits its request for a Class 2 Permissive Change for the above transceiver.

Motorola is requesting the FCC to amend the Grant Notes to clarify collocation of transmitter antennas.

The Grant Notes currently contain the following statement:

**"The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 40 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter."**

This statement has been mis-interrupted by some of our customers. Please re-issue the grant without the "or transmitter".

All data, including RF Exposure, reported to the FCC at the time when Certification was granted continues to be compliant.

Please contact me at (954) 723-5793 if you require any additional information.

Sincerely,  
*/s/Mike Ramnath (signed)*
