Subject: Application for Class 2 Permissive Change to FCC Authorized Transceiver with FCC ID: AZ492FT7089

Dear Sir/Madam,

A permissive change is requested for the subject transceiver which is marketed in United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

- Current parts have been End of Life (EOL) and the new parts have been implemented from approved supplier list (ASL) in order to continue supply. The component changes are made within the FGU, VHF/UHF Front End of the transceiver. The component changes are:
 1. Pin-to-pin compatible
 2. Has the same basic function as the previous chip
 3. No changes in radio parameters
 4. Does not impact PCB re-layout (Transmitter)

B. PERFORMANCE DIFFERENCES:

- EME has been assessed base on MPE and found no degradation. However, degradation was found in EMC compared to the original filing but still within the FCC limits.

C. CONCLUSION:

- This radio continues to meet al FCC emissions requirements for which authorization was granted. However, degradation was found in EMC compared to the original filing but still meet requirements of a Class-2 Permissive Change.

Sincerely,

Deanna Zakharia
Regulatory Compliance Manager
