

The Wrist Panic was previously approved by the FCC on 04/21/2000, with the FCC ID: B4Z-781A-Panic. Since the approval we have changed the board layout a little and had it re-tested at TUV-Product Services. Enclosed with this submission you will find new schematics and a new test report showing the plots and test data after the change in the device.

Thank you,

Ken Nelson  
Compliance Coordinator.
