

Antenna Info

Antenna Description

The antenna belongs to a wire loop antenna type. This is an electrically small loop, formed of a wire and PCB ground plane.

The unit with this antenna has effective isotropic radiated power EIRP -2.53 dBm in the direction of the antenna's strongest beam.

The antenna is internally permanently mounted and the design of the device ensures that no other antenna shall be used. The device is completely compliant with FCC Section 15.203 requirements.
