FCC ID: B8OVRB101

To whom it may concern:

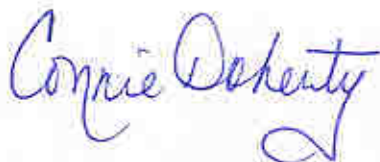

Vinvox request a Class 2 Permissive Change or modification of presently authorized module under FCC ID: B8OVRB101.

The purpose of the request is to allow module integration into host equipment VRB101.

The VRB101 is designed for connection to the On-Board Diagnostics (OBD) port of a passenger vehicle. It is only operational in conjunction with the host vehicle into which it is installed, and only when attached to the OBD port with the supplied plug.

The VRB101 can be used within 20cm of the vehicle occupants but is exempt from SAR evaluation on the basis of the source-based time-averaged output power being $<60/f(\text{GHz})$ as per KDB447498 Section 2(a)(i).

Yours sincerely,

Connie Doherty

Chief Financial Officer

VINVOX INTERNATIONAL CORP.
