REGARDING : FCC ID : B92IDP6XX

Dear Sir/Madam,

This Declaration is to support our application for the IDP-680 and IDP-690 for FCC certification.

The IDP-680 and IDP-690 have identical electronics. The only difference between the models is that the IDP-680 employs passive patch antenna and IDP-690 uses quadrifilar helix. The IDP-690 antenna has more gain on the horizon. This makes the IDP-690 a better choice for marine applications.

The Test Report is representative for both models as radiated power and emission were tested separately for each model.

Signed by and for the manufacturer:

A handwritten signature in black ink, appearing to read "Doug Reveler", with a long horizontal stroke extending to the right.

Name: Doug Reveler
