

FCC ID: **B94-5185-3843**

The HP 5185-3843 is a WLAN board used in different HP print servers and can be used in different other HP applications. The board uses an internal USB interface to connect to the main application.

HP ensures in all applications that the board the power supply is within the limits the board was originally tested.

The board was tested in two different print server applications, with the optional external antenna. The max gain the application was tested with is 2.1 dBi.

The internal antenna has 0 dBi gain and wasn't tested but checked to verify the lower EIRP values.
