Federal Communications Commission
Authorization and Evaluation Division

Request for Modular Approval for FCC ID: B94HNAR01

Item	Requirements	EUT
1.	The modular transmitter must have its own RF shielding.	The module is equipped with its own shielding case.
2.	The modular transmitter must have buffered modulation / data inputs.	The module has buffer modulation / data inputs.
3.	The modular transmitter must have its own power supply regulation.	The module has its own power supply regulation.
4.	The module must comply with the antenna requirements of Section 15.203 and 15.204(c).	The EUT meets the FCC antenna requirements. The spurious emission, unique antenna connector and photo of antenna are shown in the external and internal photos.
5.	The modular transmitter must be tested in a stand-alone configuration.	The module is tested on evaluation board which is a stand-alone HW.
6.	The modular transmitter must be labeled with its own FCC ID number.	The module transmitter will be labeled with its own FCC ID, and for OEM integration the integration manual contains labeling instructions for the host device per Part 15.212 (vi)
7.	The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.	The module approved transmitter complies with all applicable rules and the integration manual contains any specific requirements addressed to the integrator and/or to the end-user of the final end-product.
8.	The modular transmitter must comply with any applicable RF exposure requirement.	With the dedicated antenna (4 dBi) the module transmitter complies with the FCC RF exposure requirements for fixed and mobile applications.

Effective Date: Immediately.
