SUBJECT: Class II Permissive Change for FCC ID: B94HNHWWR, Model: MU736

The product, WWAN Module Card, has been granted by FCC dated 04/03/2013 under FCC ID: B94HNHWWR. The intension of this application is to enable the modular certified FCC ID: B94HNHWWR to be integrated in hp Notebook PC/ Model: TPN-Q154

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: B94HNHWWR was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna of the same type but of lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.

Sincerely,

Peter S. Tevlin
