Zeevo - Customer Products

Zeevo offers comprehensive portfolio of BQB qualified Bluetooth System-on-a-Chips (SOC) BlueStamp module solutions for wireless communications. Zeevo's Bluetooth SOC's combine radio, link controller, audio and CPU functionality in a single chip. The modules are base Zeevo's pre-certified family of Class 2 BlueStamps using Bluetooth SOC. The only external component needed is an antenna. Zeevo products significantly reduce BOM costs and development cycle time.

Description	Product	Customer
