Regulatory User
guide_BCM92045...

Hi Mike,

HP has revised user's manual again per your instruction.
Pls see the attachment.
Thanks,

Claire

Hi Claire:

As I indicated in my question #1, this device is considered as portable device so in ther revised user manual, the required 20 cm separation distance can not be maintained.
Suggest statement :

Caution: Exposure to Radio Frequency Radiation.
To comply with FCC RF exposure compliance requirements, this device must not be co-located or operating in conjunction with any other antenna or transmitter.

M.Kuo

Hi Mike,

Pls see our answers.

Question #1: Bluetooth Dongle when used with notebook computer, it is considered as portable device with less than 20 cm separation distance when the notebook computer is positioned in lap held operating condition. MPE estimate contains in the test report is not applicable to addres RF exposure for portable device. Please remove these sections.
<answer>report is revised, pls see the attachment.

Question #2: User manual does not contain information required per section 15.21 of FCC rules and does not contain information to address RF exposure compliance and non-colocated restriction. Please submit revised user manual to address above requirements.
<answer>pls see revised user's manual.

Thanks,

Claire
