Re: Supersede request for FCC ID: B94SHNGD1605; Granted on 02/24/2016

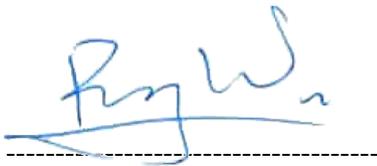

To Whom It May Concern:

Due to multiple similar projects in process at the same time, we apologize that we have attached the wrong SAR Test Report to this application. We have reviewed the test data and confirmed that the submitted data does represent the certified EUT and only the wrong SAR Test Report were submitted.

To prevent misunderstanding to the public, we would like to request the FCC to supersede the exhibit described as "SAR Test Report" outlined below with red color. A new revised exhibit is attached for replacing the previous wrong SAR Test Report.

Thanks.

Sincerely yours,

Roy Wu / Manager
