RE: FCC ID: BAA9JKTD-L1630_ATCB004105
Attention: Rod Munro

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the standard paragraph stated on page 5 of the report states 15.109(a). Please explain the use of 54dBuV/m in table on page 5 of the report. The limits for unintentional radiators Class B for the frequencies below 1GHz are a QP limit. Only those frequencies above 960MHz are 54dBuV/m. And only frequencies above 1GHz are average.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
