RE: Fujitsu Ten Limited

FCC ID: BAB27000297

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Internal photographs can not simply be held confidential. Further justification must be provided before confidentiality can be granted on these exhibits. Additionally, if only certain pages of this exhibit are to be held confidential, then the exhibit must be separated into 2 parts, one not held confidential, and one that is.
- 2) The parts list provided does not appear to be covered by confidentiality. Please confirm or correct the confidentiality exhibit.
- 3) Peak power appears to be possible to +5 dBm per the 2<sup>nd</sup> page of the block diagram. This is much different than expected. Please explain and/or fix.
- 4) Is a photograph of the PCB layout Photo-2 (RF-unit solder-side) available without the metal "bar" across the board?
- 5) It appears that only part of the RF schematics may have been provided. Please explain and/or provide as necessary.
- 6) Please provide an appropriate labeling exhibit for this device.

IC Issues

- 7) The application form specifies D1N emissions, while the block diagram page 2, and the FCC application shows P0N and QXN. Please provide justification for the emissions designator.
- 8) Please provide the missing forms mentioned in your message regarding this application.

Timothy R. Johnson

Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
