RE: FCC Certification for Ricoh, FCC ID: BBP-W3GEWS101

To whom it may concern:

The enclosed documents constitute a formal submittal and application for system approval for an 802.11bgn with Bluetooth 2.0 handheld tablet pursuant to the following rules:

Subpart C of Part 15 of FCC Rules (CFR 47)

The applicant is seeking certification for both the DTS functions and the DSS functions, per FCC 15.247. The 802.11n function is limited to single chain operation only. The Bluetooth and the WiFi share the same antenna, and therefore can not transmit simultaneously.

Included in the application is SAR data to support the use of the tablet device with the Fusion Wireless CDMA radio module, FCC ID: XU9-FW2770P. A Class II Permissive Change has been filed for the CDMA radio module to address the co-location and use conditions with the Ricoh tablet.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Mark Hill
Staff Engineer
