Importance: High

Hello PCTEST TCB,
Thank you for your e-mail.
Please find the attachments.
Please let me know if you have any further question.
Thank you!

Best regards
Han.

Subject: RE: Questions Regarding FCC ID: BEJGM360

Dear Ms. Lim,

Thank you for your response.

1. The revised schematic diagram file provided in response to RT question #1 has been corrupted and cannot be opened. Please provide another schematic diagram file.
2. Please update the dates in the tissue verification and system validation tables provided on page 66 of the SAR test report to reflect the dates provided in the new plots that were provided in response to RT question #2.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Mark Czumak
Certification Engineer

RE: FCC ID: BEJGM360

Applicant: LG Electronics USA

Correspondence Reference Number: BEJ100370
Confirmation Number: 1Y1004010370-72
Date of Original Email: April 2, 2010

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. The title block of the schematic diagrams has the incorrect EUT model number.

Please revise.

→ Please find the attachment.

2. The GPRS 850 (4 slot) mid channel SAR level provided in the measurement results table on page 13 of the SAR report has a SAR level greater than 0.8 W/kg and therefore does not qualify for test reduction.

Please provide the required test data for the low and high channels for this configuration.

→ Please find the attachment. (Page 65 ~ page 72)

3. The Table of Contents on page 2 of the 22/24 Certification report has incorrect page numbers for sections 6 through 8. Please revise.

→ Please find the attachment.

4. The Table of Contents on page 2 of the Bluetooth report has the incorrect page number for section 8. Please revise.

5. The Date of Issue located in the footer of the Bluetooth report starting on page 2 and through the rest of the report does not match what is provided on the front page of the report. Please address.

6. The List of Test Equipment in section 8 of the Bluetooth test report has a horn antenna that is out of calibration at the time of test. Please address.

→ Please find the attachment.

7. As shown in the provided EUT test photos for the 15B Certification report, the EUT is connected to a laptop pc (along with the peripherals) which is connected to a LISN. The description of the test configuration on page 7 of section 2.1 in the 15B Certification report indicates that the EUT is connected directly to a separate LISN. Please correct the description to more accurately depict the system test set-up.

→ Please find the attachment.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Mark Czumak
Certification Engineer
