

Test setup photos of EUT

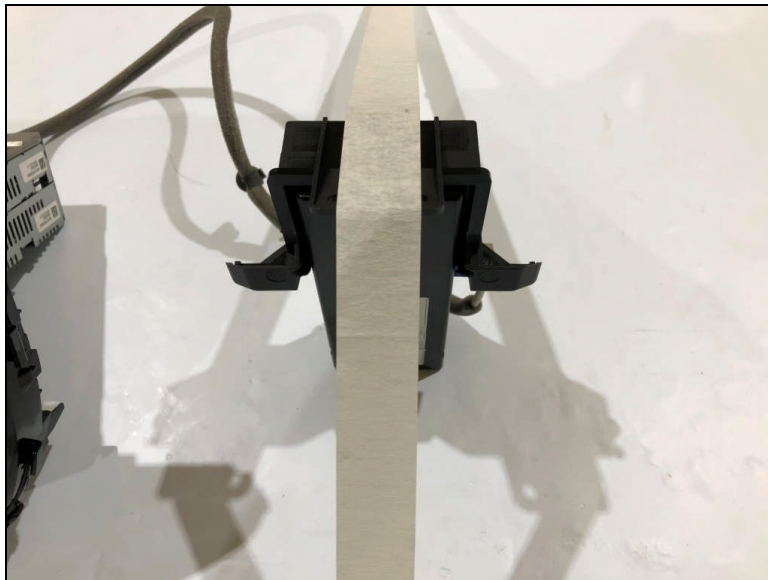

1. Orthogonal planes of EUT

- The testing was set in the three orthogonal planes and measured for each position (X, Y, Z).

A. X-axis

B. Y-axis

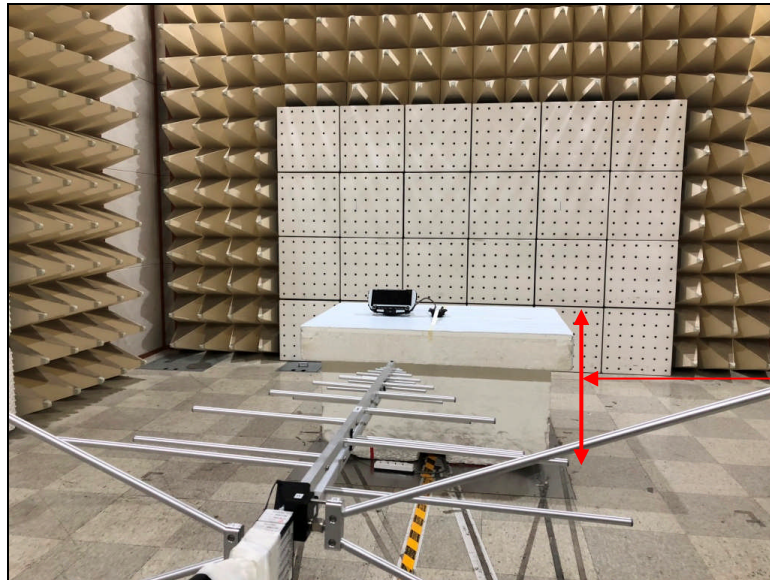

2. Worst case of orthogonal planes each frequency band

- Test setup photos were reported as representative worst axis after radiated measurements for each position were complete.
- The test orthogonal plan of EUT is X – axis during radiation test.
