RE: LG Electronics

FCC ID: BEJKE260

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) The Bluetooth block diagram is missing a frequency for the oscillator. Please provide.
- 2.) Please confirm if a Part 15B Grant as a Computer Peripheral is requested for this device in addition to Part 24 Licensed and Part 15C Unlicensed radios.
- 3.) FYI: In the future, could you kindly place the SAR reports in the RF Exposure folder at the FCC website?
- 4.) Please review Page 50 of the SAR report. Unless I am mistaken, the highest body-worn SAR should be .178W/kg and not .134W/kg as listed in the Manual and also on the SAR summary sheet in the SAR report. Your comments please?

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
