

LG231C Draft User Manual

Part 15.21 statement

" Change or Modifications that are not expressly approved by the manufacturer could void the user's authority to operate the equipment. "

Part 15.105 statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Part 15 Class B Compliance

This device and its accessories comply with part15 of FCC rules.

Operation is subject to the following two conditions:

- (1) This device & its accessories may not cause harmful interference.
- (2) This device & its accessories must accept any interference received,
including interference that may cause undesired operation.

Body-worn Operation

This device has been tested for typical body-worn operations

with the distance of 0.79inches (2.0cm) from the user's body.

To comply with FCC RF exposure requirements, a minimum separation distance of 0.79inches(2.0cm) must be maintained from the user's body.

Additionally, Belt clips, holsters & other body-worn accessories may not contain metallic components.

1 Prepaid

9.3 Security

The Security menu allows you to secure the phone electronically.

9.3.1 Lock Phone

Keeps your phone from unauthorized use. Once the phone is locked, it is in restricted mode until the lock code is entered. You can still receive phone calls and make emergency calls. You can modify the lock code by setting a New Lock code within the Security menu.

1. Press [MENU] → 9 → 3

2. Enter the four-digit lock code and press [OK].

The default lock code is commonly the last 4 digits of your phone number.

3. Press [1] **Lock Phone**.

4. Use Up/Down Navi Key to select an option, then press [OK].

Unlock The phone is never locked (Lock mode can be used).

Lock The phone is always locked. When locked, you can receive incoming calls and make only emergency calls.

On Power Up The phone is locked when it is turned on.

9.3.2 Restrictions

Allows you to restrict Calls, Messaging or Data.

1. Press [MENU] → 9 → 3.

2. Enter the four-digit lock code and press [OK].

3. Press [2] **Restrictions** and enter the four digit code.

4. Use to select between Incoming Calls/ Outgoing Calls/ Incoming Messages/ Outgoing Messages/ Data, then press [OK].

9.3.3 Change Lock Code

Allows you to enter a new four-digit lock code.

1. Press [MENU] → 9 → 3.

2. Enter the four-digit lock code and press [OK].

3. Press [3] Change Lock Code and select Phone Only/ Call & Applications.

4. Enter a new 4-digit lock code and press [OK].

5. For confirmation, it will ask you to enter the new lock code again.

9.3.4 Reset Default

Allows you to reset your phone to factory default setting except prepaid-related parameters.

1. Press [MENU] → 9 → 3.

2. Enter the four-digit lock code and press [OK].

3. Press [4] **Reset Default** and press [OK].

4. Read the displayed message and press [OK] to continue.

5. A message will pop up that says "Preference settings will be set to factory defaults. Press <OK> to continue." Press [OK].

6. Use Up/Down Navi Key to highlight an option (below) and press [OK].

Revert/ Cancel.

9.4 Call Settings

The Call Settings menu allows you to designate how the phone handles both incoming and outgoing calls.

9.4.1 Answer options

Allows you to determine how to handle an incoming call.

1. Press [MENU] → 9 → 4 → 1.

2. Use Up/Down Navi Key to select a setting (from below), then press [OK].

Flip Open/ Any Key/ Send Key Only/ Auto Answer

9.4.2 Auto Retry

Allows you to set the length of time the phone waits before automatically redialing a number when the attempted call fails.

1. Press [MENU] ➔ 9 ➔ 4 ➔ 2.
2. Use Up/Down Navi Key to select a setting (from below), then press [OK].
Off/ Every 10 Seconds/ Every 30 Seconds/ Every 60 Seconds

9.4.3 One-Touch Dial

Allows you to initiate a speed dial call by pressing and holding the speed dial digit. If set to Off, Speed Dial numbers designated in your Contacts will not function.

1. Press [MENU] ➔ 9 ➔ 4 ➔ 3.
2. Use Up/Down Navi Key to select a setting, then press [OK].
On/ Off

9.4.4 Voice Privacy

Allows you to set the voice privacy feature for CDMA calls as Enhanced or Standard. CDMA technology already offers inherent voice privacy. Check with your service provider for availability.

1. Press [MENU] ➔ 9 ➔ 4 ➔ 4.
2. Use Up/Down Navi Key to select a setting, then press [OK].
Enhanced/ Standard

9.4.5 Voice Clarity

1. Press [MENU] ➔ 9 ➔ 4 ➔ 5.
2. Use Up/Down Navi Key to select a setting, then press [OK].
On/ Off

9.4.6 Airplane Mode

Allows you to use features on your phone that do not require wireless communications.

1. Press [MENU] ➔ 9 ➔ 4 ➔ 6.
2. Read the displayed message and press [OK] to continue.
3. Use Up/Down Navi Key to select a setting, then press .
On/ Off

9.4.7 TTY Mode

Allows you to attach a TTY (Teletype writer) device, enabling you to communicate with parties also using a TTY device. A phone with TTY support is able to translate typed characters to voice. Voice can also be translated into characters and then displayed on the TTY.

1. Press [MENU] ➔ 9 ➔ 4 ➔ 7.
2. Read the displayed message and press [OK] to continue.
3. Use Up/Down Navi Key to select a setting, then press [OK].
TTY Full/ TTY + Talk/ TTY + Hear/ TTY Off

9.5 Bluetooth

9.5.1 Paired Devices

Pairing is the process that allows the handset to locate, establish and register 1-to-1 connection with the target device.

For pairing new Bluetooth® device

1. Press [MENU] → 9 → 5 → 1.
2. Follow the Bluetooth® accessory instructions to set the device to pairing mode.
3. Press Left Soft Key **Search**.
4. If Bluetooth® power is set to off, you will be prompted to turn power on. Highlight **Yes** and press [OK].
5. Choose to conduct a **New Search** or to bring up the results of the **Last Search** (if applicable).
6. The device will appear in the Found Devices menu once it has been located. Highlight the device and press [OK].
7. The handset will prompt you for the passkey.
Consult the Bluetooth® accessory instructions for the appropriate passkey (typically "0000" - 4 zeroes). Enter the passkey and press [OK].
8. Once pairing is successful, select between **Always Ask/ Always Connect**.
9. Once connected, you will see the device listed in the Paired Devices menu.

9.5.2 Power

Allows you to set the power On/Off.

1. Press [MENU] → 9 → 5 → 2.
2. Use Up/Down Navi Key to select a setting, then press [OK].
On/ Off

Note

By default, your device's Bluetooth® functionality is turned off.

9.5.3 My Visibility

Allows you to set the visibility of your Bluetooth® device.

1. Press [MENU] → 9 → 5 → 3.
2. Use Up/Down Navi Key to select a setting, then press [OK].
Visible/ Hidden

Note

If you turn on My Visibility, your device is able to be searched by other in-range Bluetooth® devices.

9.5.4 My Bluetooth Name

Allows you to edit the name of the Bluetooth® device.

1. Press [MENU] → 9 → 5 → 4.
2. Hold down [BACK] to clear the existing name.
3. Use the alphanumeric keypad to enter a new alias.
4. Press [OK] to save and exit, or Right Soft Key **Cancel** to cancel editing.

9.5.5 My Bluetooth Info

Allows you to view the information of the Bluetooth® function.

1. Press [MENU] → 9 → 5 → 5.

9.6 System

The System menu allows you to designate specific system network settings.

9.6.1 Network

9.6.1.1 System Select

Allows you to set up the phone producer's management environment. Leave this setting as the default unless you want to alter system selection as instructed by your service provider.

1. Press [MENU] → 9 → 6 → 1 → 1.
2. Use Up/Down Navi Key to highlight Home Only/ Automatic A/ Automatic B then press [OK].

(Depending on the available PRL, the options may differ between **Automatic** or **Automatic A/ Automatic B**).

9.6.1.2 Serving System

Identifies the channel number of a system that is served as an SID Number. This information should only be used for technical support.

1. Press [MENU] → 9 → 6 → 1 → 2.

9.6.2 Location

Menu for GPS (Global Positioning System: Satellite assisted location information system) mode.

1. Press [MENU] → 9 → 6 → 2.
2. Use Up/Down Navi Key to highlight a setting, then press [OK].

Location On/ E911 Only

Note

GPS satellite signals are not always transmitted, especially under bad atmospheric and environmental conditions, indoors etc.

9.7 Phone Memory

Allows you to check out the memory status of your phone.

1. Press [MENU] → 9 → 7.
2. Use Up/Down Navi Key to highlight **Reserved Memory/ Multimedia**, and press [OK].

9.8 Phone Info

The Phone Info menu provides you with specific information pertaining to your phone model.

1. Press [MENU] → 9 → 8.
2. Use Up/Down Navi Key to highlight an option and press [OK], or press the corresponding number key.

HAC(Hearing Aid Compatibility)

Safety

FCC Hearing-Aid Compatibility (HAC) Regulations for Wireless Devices

On July 10, 2003, the U.S. Federal Communications Commission (FCC) Report and Order in WT Docket 01-309 modified the exception of wireless phones under the Hearing Aid Compatibility Act of 1988 (HAC Act) to require digital wireless phones be compatible with hearing-aids. The intent of the HAC Act is to ensure reasonable access to telecommunications services for persons with hearing disabilities.

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless phones, to assist hearing device users find phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. T4 is the better/higher of the two ratings.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise. The hearing aid and wireless phone rating values are then added together. A sum of 5 is considered acceptable for normal use. A sum of 6 is considered for best use.

HAC(Hearing Aid Compatibility)

In the above example, if a hearing aid meets the M2 level rating and the wireless phone meets the M3 level rating, the sum of the two values equal M5. This is synonymous for T ratings. This should provide the hearing aid user with "normal usage" while using their hearing aid with the particular wireless phone. "Normal usage" in this context is defined as a signal quality that is acceptable for normal operation.

The M mark is intended to be synonymous with the U mark. The T mark is intended to be synonymous with the UT mark. The M and T marks are recommended by the Alliance for Telecommunications Industries Solutions (ATIS). The U and UT marks are referenced in Section 20.19 of the FCC Rules. The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

To ensure that the Hearing Aid Compatibility rating for your phone is maintained, secondary transmitters such as Bluetooth

and WLAN components must be disabled during a call.
See Page 86 for instructions to disable these components.
