## Cover Letter

**Subject: Request for exhibits update**

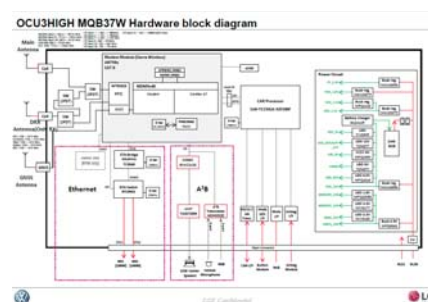

To Whom It May Concern:

Our device was approved a few years ago.

We submitted a draft manual when we submitted the exhibits, which included a page of block diagram for the product. And we inserted an annotation into the manual and blanked the corresponding page of the manual as follows.

<figure 1>

<figure 2>

But, removing the text-box in the manual displays a block diagram as shown on the right (figure 2). We recognized that the block diagram is open to the public because the annotation (text-box) can be deleted. We politely request FCC permission to replace the manual through audit mode for the following FCC IDs.

| FCC ID        | Date of Grant | Exhibit type               | Exhibit |
|---------------|---------------|----------------------------|---------|
| BEJTLVHW3IU-E | 05/31/2019    | Original Grant             | manual  |
| BEJTLVHE4IU-E | 09/06/2019    | Original Grant             | manual  |
| BEJTLVHM3IU-N | 03/31/2020    | Class II Permissive Change | manual  |

In general, we are aware that replacement of exhibits is not permitted.

However, our confidential information may be exposed by the submitted manual.

We would appreciate it if the FCC could approve this request.

Sincerely,

Contact Name: Sung Soo Kim
