The image shows two custom-made printed circuit boards (PCBs) lying on a blue textured surface. Each PCB is yellow and has a unique, irregular shape. Both boards are populated with four microswitches arranged in a 2x2 grid. The switches have silver-colored metal housings and coiled internal springs. A red and black twisted-pair wire is connected to the top of the right-hand PCB.

The image displays two green printed circuit boards (PCBs) for the B250HGB08A410 module, set against a blue background. The PCBs are oriented horizontally, with their labels and components clearly visible.

Left PCB:

- Top Label:** B250HGB08A410
- Top Right:** CN_KB_KB-3150
- Top Center:** 35-80532-Y0-41
- Top Left:** 35-005663-U01-100
- Center:** MP RUN PLU51 NEG1
- Bottom:** PLU52 NEG2
- Bottom Left:** 94V-0 KY033H 7 3909
- Bottom Right:** BATT+ BATT- HF1

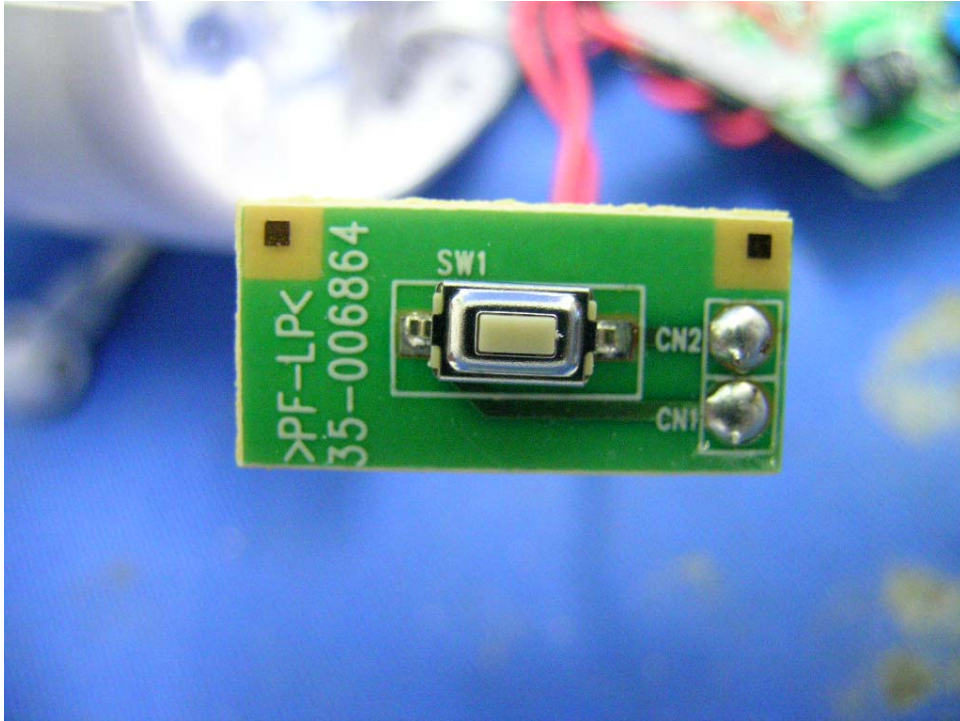

Right PCB:

- Top Label:** B250HGB08A410
- Top Right:** CN_KB_KB-3150
- Top Center:** 35-80532-Y0-41
- Top Left:** 35-005663-U01-100
- Center:** MP RUN PLU51 NEG1
- Bottom:** PLU52 NEG2
- Bottom Left:** 94V-0 KY033H 7 3909
- Bottom Right:** BATT+ BATT- HF1
