The image shows a small, rectangular black electronic component, possibly a microcontroller or a specialized sensor module, placed on a blue textured background. A black metric ruler is positioned horizontally above the component, showing measurements from approximately 10 mm to 90 mm. Another ruler is visible vertically on the left side of the frame. The component features a white label with the following details:

- A circular logo at the top right.
- The word "EPCOS" printed upside down relative to each other.
- A barcode.
- Part numbers: "1 672 018-01d/2pinSj" and "1 672 018-01d/2 pin".
- Other markings include "MAK", "R4V", "T1800", and "5000".

Two thin, light-colored wires are soldered to the component: one connects to a multi-pin header on the left, and the other extends from the right side.
