RE: FCC ID: BV8M7200_ATCB004883

Attention: Kathy Grzovic

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the request for confidentiality states that confidentiality includes attestations. Please note that as there are no separate attestations provided in this application please remove this from the request. Please also note that cover letters cannot be held confidential.
2. Please note that the confidentiality request states the term "application descriptions". Please explain this term. Is this referring to the "theory of operation" or "operational description"? If so, please correct the request to clearly identify the exhibit being referenced (i.e. please clearly state "operational description" or "theory of operation".)
3. Please note that the theory of operation for the device is being presented as a reason for PC (see Rheintech header page for this exhibit). Please note that this would be a cover letter and not a theory of operation. It is recommended that the exhibit be re-named "Theory of operation" and that the cover letter "Cover ltr CS-7200 5 4 07.pdf" be used as the reason for PC exhibit.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
