Subject: FCC ID: BV8M7200
Class II Permissive Change

M/A-COM seeks Equipment Authorization Grant for M7200 700/800 MHz mobile radio equipment through a Class 2 Permissive Change.

Two areas of product change are addressed in this Class 2 Permissive Change. PC board artwork has not been changed and features included in the original design have now been made active (i.e. an emission designator addition). The second area of change is associated with product improvement, manufacturing yield improvement and performance improvement. A number of component values have been adjusted and improved upon to yield these improvements, and detailed in Appendix A of the test report.

Agent authority, confidentiality, etc. letters have been supplied to Rhein Tech Labs so that they may act on M/A-COM's behalf in processing this change.

Thank you for your kind consideration and timely review of this change application.

Sincerely,

A handwritten signature in black ink that reads "Daryl S. Popowitch".
