RE: FCC ID: BV8MBS700A100\_ATCB001440

Attention: Rick McMurray / Kathy Grzovic

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the photos on pages 18, 19 and 20 of the internal photo exhibit are not clear. Please provide photos that clearly show the components and board structures.
2. If the manual digital size is too large, please provide that portion of the installation manual that shows all of the FCC regulatory notices and statements have been addressed. IF the installation manual is of a size less than 4Meg, please provide the installation manual. Please note that if this manual is desired to be confidential, please include this in the confidentiality request letter.
3. As the device appears that is may work on one or more of the channels between channels 1 through 8 in the 764 to 767MHz band, please explain how this device meets 90.541(d) which states, "Transmitters operating on the narrowband low power channels listed in §§90.531(b)(3), 90.531(b)(4), must not exceed 2 watts (ERP)."

A handwritten signature in black ink that reads "Dennis Ward".

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
