**SAR ATTESTATION**

12K1F9W and 8K40F9W emission designators are being added with this C2PC.

Conducted power has not changed. There have been no changes to the enclosure nor the PCB's.

The emission designator additions are for protocol modes of operation. The bandwidth of these emission designator additions have been previously SAR tested and reported, with frequency ranges similar to those of this addition(s). This can be seen by looking at page two of the report where a comprehensive mode – emission designator table resides.

SAR values measured have been well below the Commission's limits. Harris Corporation believes that additional SAR testing would not reveal anything already reported and therefore has not performed the testing nor provided a SAR test report for this change.

A handwritten signature in black ink that reads "Daryl G. Popowitch". The signature is written in a cursive, flowing style.

Daryl Popowitch
