Harris seeks application approval for a Class 2 Permissive Change/Reassessment on the P7200 portable radio.

A test report is included as an exhibit with the application filing. The change is to add emission designators in one case for the 800 MHz band and in the second case, the 700 MHz band. Also, for Industry Canada, 700 MHz band operation is being added to the certification.

In both instances no hardware changes were made, nor was PC board artwork changed. No mode additions have been made either. These emission types have been enabled in the radio product and are to be made available to our customer base.

Rhein Tech Laboratories, Inc. agent authorization letter to act on Harris' behalf for this change filing has been provided.

Thank you for your kind consideration and timely review.

Sincerely,

A handwritten signature in black ink that reads "Daryl S. Popowitch". The signature is fluid and cursive, with "Daryl" and "Popowitch" being the most distinct parts.

Daryl Popowitch
Regulatory Manager
