RE: FCC ID: BV8VIDA-BB-CL_ATCB004711
Attention: Kathy Grzovic

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the MPE listed on page 15 of the manual states a maximum conducted output of 20dBm. Please note that the MPE report states a maximum conducted output of 27dBm. Also, please note that the manual on the same page states "In all cases, 0.2 meters (8 inches) is the recommended minimum safe distance for fixed installations." Please note that this does not appear to agree with the highest power (27dBm) and antenna values for a minimum safe distance. Please explain and/or correct the documentation to be consistent and in line with the actual power out of this device.

Response: Please refer to the revised manual uploaded with this response.

2. Please note that I did not see any band edge compliance plot data. Please explain.

Response: As agreed previously, this is not an issue.

A handwritten signature in black ink, appearing to read "Dennis Ward", is placed here.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
