ATTESTATION

Temporary Fixed Installation

Part 90 Subpart Y

Harris equipment under the referenced FCC ID number is intended for deployment in base station, temporary-fixed, and mobile applications.

MPE is included in filed exhibits for mobile applications. Antenna types for all three applications are included in the Installation manual and antenna data sheets have been filed as exhibits as well.

In accordance with FCC-03-99 Report and Order, and § 90.1217 (RF Hazards) of the FCC rules (CFR 47), base station and temporary-fixed station RF safety is to be determined at the time of jurisdictional geographic system license application and grant.

It is understood that end users (or their representative) making application for a system license have complete understanding of the requirements in Subpart Y and the intent of rule content within the Final Report and Order (FCC-03-99).

Sincerely,

A handwritten signature in black ink that reads "Daryl G. Popowitch". The signature is written in a cursive, flowing style.
