

TO WHOM SO EVER IT MAY CONCERN

Gothenburg, 30th Sept 2010.

MODEL DIFFERENCE LETTER, FCC ID: BXZDH5 (IC: 3724B-DH5)

This letter is to explain the differences between the variants of Ascom(Avaya) DH5 handset with Bluetooth capability(DH5BL) and without Bluetooth capability (DH5). The variant with bluetooth capability has previously been certified under FCC ID: BXZDH5BL (IC: 3724B-DH5BL).

DH5 handsets without bluetooth (DH5) use the same PCB and have the same components as the DH5BL, the only difference in the hardware is that the bluetooth module is removed from the DH5. All DECT related RF-parameters are identical between the models.

All plastic parts are the same between the models.

Very truly yours,

Lena Kindmark
Certification Engineer
