RE: FCC ID: C4ZAAWA0000

Attention: Toyokazu Imamura

I have a few comments on this Application.

- 1 Please correct the 731 to correspond to the proper requirements under 15.249. The report states -5 dBm and the 731 states 3mW. Please note that 15.249 devices are classified in field strength not power. Since power measurements have no bearing on the device, please remove all power references from the documentation. **xxx**
- 2 Please note the label shown on the product is not the same as the label shown in the sample. Please provide a picture of the label as it will be on the device. Please show this label on the device. **xxx**
- 3 Please note that the FCC DoC logo does not appear to be an appropriate logo for this device. Since the receiver is verified, it does not appear to fit any of the categories under 15.101 for DoC. Please note the only devices that may use this logo are found in 15.101. This means that while the associated dongle used with the device may have the DoC logo as a computer peripheral, the 'watch' may not since it does not connect directly to the PC. Improper use of this logo is a violation of CFR47 and may carry penalties. You will have to remove this logo or show justification for placing this logo on the device. **xxx**
- 4 Please clarify what type or receiver is contained within the device. **xxxx**
- 5 FYI Please note that 15.249 devices are categorically excluded from rf exposure. No RF exposure information is needed for this product if it is in compliance with 15.249. RF exposure information will not be uploaded to the FCC data base and should be removed from the filing altogether. **xxx**

A handwritten signature in black ink that reads "Dennis Ward". The signature is fluid and cursive, with "Dennis" on the top line and "Ward" on the bottom line.

Dennis Ward
