Subject: FW: Seiko Instruments Inc., FCC ID: C4ZAB000002, Assessment NO.: AN08T7830, Notice#1

Dear Rie,

Please address following issues.

Q#1: Per 15.19, the label should contain following statement since the EUT size is large enough.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Please revise the label format.

Q#2: Per 15.247 and 2.1091, related RF exposure statement as following should be added to the user manual.

The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

Please address.

Q#3: As indicated in the EUT external photos and test setup photos, a clamped tye ferrited core was added on the power cable. Please provide as statement to show that ferrite core will be implemented to the production line.

Q#4: As indicated in the test report, only DH1 mode was conducted in dwell time test which is not acceptable. Please provide additioanl DH3 and DH5 test result.

FYI 1: The max. output power measured in conducted is -1.58dBm (0.0007W) will be listed in the grant instead of the max. EIRP value. Moreover, it's not required to test with different voltage.

Best Regards,

Lucy

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
