Subject: Long-term Confidentiality Modification request for FCC ID: C4ZAB000005

Dear FCC,

Seiko Instruments Inc. would like to request that the Block Diagram, Schematics, Operational Description and SDR Software/Security Info exhibits be held confidential for FCC ID C4ZAB000005. Confidentiality had been requested at the time of filing with the TCB (UL Verification Services) and while these exhibits were marked and held confidential for the NII equipment filing they were not held confidential for the DTS filing (reference filing number TC593702).

Seiko Instruments understands that these exhibits have been in the public domain and may be available on other public sites not controlled by the FCC. Seiko would still request that the status for the relevant documents be reset to confidential on the FCC Site as per the original request.

Regards,

A handwritten signature in black ink, appearing to read "Yasuyuki Mitsuoka".
