RE: Foxpro Inc.

FCC ID: C6M615

1. In the test report on page 19 of 22 you state there are 78 hopping frequencies yet on page E35 it shows and states only 25. Please explain or correct.

Response: Page 19 has been corrected to state 25 channels. The data sheet is correct as this product will have 25 hopping frequencies.

2. The user manual need the co-location statement as follows.

The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

Response: Please see the Revised Owners Manual. It is on page 30 of the manual (pdf page 33)
