Subject: MicroTrack Enclosure Modification.

Processing Staff:

The external photo of the MicroTrack enclosure has a modification as a result of the preliminary emissions tests. A filter plate was added to suppress harmonics radiated from the power and communication lines. The connectors for these lines were then mounted on a panel external to the main enclosure. This modification will be included in all production units as shown in the Photo titled "MT-Enclosure filter plate".

Sincerely,

A handwritten signature in cursive script that reads "James Cheal". The signature is written in dark ink on a light-colored, slightly textured background.
