Regarding FCC ID label placement for this application, DMP wishes to place the label on the printed circuit board. This location will offer and ensure the end user opportunity to view the label before operation. The identifier label will be readily viewable each time the detector is serviced. The equipment is sold without the battery installed or required installation offering the end user and installer exposure to the label before operation. This location will help ensure the longevity of the label as this equipment may be in service in harsh environments.

A handwritten signature in black ink, appearing to read 'Terry Shelton'. The signature is fluid and cursive, with a prominent 'T' and 'S'.

Terry Shelton
Director of Product Quality Assurance
