

SECTION 2.1033(b) (2a). For Part 15 a brief description of the circuit functions of the device.

The 5800CO is a battery powered CO detector & alarm transmitter and is part of a wireless-alarm system. It is used in conjunction with a receiver (5881) to indicate a possible CO event to the alarm system. The messages are standard alarm messages transmitted at 345Mhz +/-82Khz using on-off keyed AM modulation. The 5800CO sends a regular supervision or check-in message, no more often than once per hour.
