

Comment:

Greg, In reviewing the uploads, we are still missing a little bit of information....There does not appear to be any information regarding the period of supervisory transmissions (i.e. meeting the FCC 2 seconds per hour and the number or supervisory TX that occur per hour or time between supervisory transmissions). Tim

Response

Tim, RE: the time between supervisory transmissions; Supervisory transmissions occur once every 76 minutes, +/- 15% (once every 65 to 87 minutes). Total on-air time for a supervision transmission is: $64 \times 312.5 \text{ uSec} + (5 \times 150 \text{ mSec}) = 0.77 \text{ seconds}$. Greg
