

SECTION 2.1033(b) (2a). For Part 15 a brief description of the circuit functions of the device.

The 5802AP transmitter pendant is worn around the neck and sends panic signals to the a alarm panel via a 5881AP receiver, signaling an emergency condition. It is identical in function and operation to our previously certified 5802 & 5802-1 with the exception of the operating frequency which is 315 MHz, rather than 345 MHz.
