

## Functional Description.

The 5804AP is a battery powered portable transmitter and is part of a wireless alarm system. It is used in conjunction with a receiver (5882AP) to allow remote control of the alarm system. It is possible to "arm", "disarm", or raise a panic alarm in the system using the 5804AP. These messages are transmitted at 315Mhz +/-82Khz using on-off keyed AM modulation. The 5804AP does not send a regular supervision or check-in message, it sends no other messages except those which are manually initiated control messages.
