

EXHIBIT 1

CFS8DL5816MN2

Functional Description.

The 5815 is a battery powered portable transmitter and is part of a wireless alarm system. It is used in conjunction with a receiver (5881) to indicate an open door or window to the alarm system.

These messages are transmitted at 345Mhz +/-82Khz using on-off keyed AM modulation.

The 5815 sends a regular supervision or check-in message, no more often than once per hour. It also sends messages initiated by the condition of the loop (open or closed).
