

SECTION 2.1033 (c) Label and label location - A photo showing the identification label clearly (you must be able to see the name and FCC ID number), and the location on the device. In lieu of a photo for this, you may submit a engineer's drawing.

Part 15.21 Statement - for all intentional and unintentional radiators is also printed on the label. All devices shall bear the following statement in a conspicuous location on the device:

“ This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. “

15.19(a)(5) When the device is so small or for such use that it is not practicable to place the Statement specified under paragraph (a) of this section on it, the information required by this paragraph shall be placed in a prominent location in the instruction manual or pamphlet supplied to the user or, alternatively, shall be placed on the container in which the device is marketed. However, the FCC identifier or the unique identifier, as appropriate, must be displayed on the device. In this case we have placed the statements in the users manual.

Engineers drawing of label location & label text.

PLEASE NOTE THAT THERE ARE INSTRUCTIONS IN THE USERS MANUAL (II) THAT INSTRUCT THE USER WHERE TO LOOK FOR THE FCC & IC ID'S (I.E.; UNDER THE BATTERY) DUE TO THE SMALL SIZE THE FCC / IC STATEMENTS ARE ALSO PLACED IN THE MANUAL.
