

6160VP FUNCTIONAL DESCRIPTION

The 6160VPADT consists of a standard Honeywell / Ademco 6160V keypad and prox card reader board in the same plastic. It outputs the proprietary Honeywell / Ademco ECP data format to a Honeywell / Ademco alarm system control panel. This allows the 6160VPADT Keypad to arm / disarm the alarm panel conventionally (with keystrokes) or with a 'prox card'.
