

TOUCH PC2 REPLY LETTER

FCC ID: CFS8DLLYNXTOUCH1
IC: 573F-LYNXTOUCH1
ATCB011373

Tim You wrote:

1) Kindly detail the changes of the device in the PC cover letter itself. It is noted off hand that the photos show the antenna change, but there did not appear to be any information pointing out the matching/value changes as well.

I Reply:

C692 is now a 24 Ohm Resistor; NO OTHER MATCHING CHANGES WERE NECESSARY. (Please refer to REV C vs REV A Schematics) Please also see REV A PC Cover Letters for a physical description of the change - these will confirm the information in EXHIBIT 4-2.

Tim You wrote:

2) Please confirm the schematic provided is for the new version. Off hand this could not be verified.

I Reply:

PLEASE SEE REV C (NEW) vs REV A (ORIG.) [NOTE: Please do not refer to "pcb rev A" in the lower right corner]

Tim You wrote:

3) Kindly confirm the date of testing on the radiated data. If very recent (i.e. last 2.5 weeks, depending on the date, the test equipment list could be considered out of calibration.

I Reply:

Please see TOUCH PC2 EXHIBIT 5-3A with date of test(08/02/2011).
