Subject : Attestation of Similarity of INVEXS190 series FCC ID: CGDINVEXS190

Dear Mrs. Bosley,

The INVEXS MD190 and INVEXS MDK190 as mentioned in test report "11\_12100801.fcc01\_INVEXS190\_testreport\_FCC CGDINVEX190.pdf" are low power communication devices operating on 13.56 MHz, the INVEXS MD190 without keyboard and the INVEXS MDK190 with keyboard.

There are several models of devices that are electrically, radio and hard ware wise the same only the names and the software in the models differ. All models are listed below:

1. Model : INVEXS M190,
2. Model : INVEXS MD190,
3. Model : INVEXS MK190,
4. Model : INVEXS MDK190,
5. Model : CUBE Card reader M190,
6. Model : CUBE Card reader MK190.

The letters stand for M=Mifare, D=DES and K=Keyboard.

DES stands for Data Encryption Standard card. This card has more security on board.

The card readers are also applied by the "CUBE" system within our company. Instead of "INVEXS" it is named "CUBE Card reader" but the letters and figures behind the names have the same meaning and there for are the same products.

We, N.V. Nederlandsche Apparatenfabriek "Nedap", declare that the model that has been tested and mentioned in the test reports is similar as the models mentioned above regarding radio testing.

I hope you can honor this request.

Best regards,  
N.V. Nederlandsche Apparatenfabriek "Nedap"

Jacques Hulshof
